

Editablecover letter

I have been a registered nurse for over 15 years with experience in PACU, critical care and med/surg. As an experienced clinical nurse and in moving into leadership roles, I remain fully invested in excellent patient care. I aim be a good leader by being of service to my leadership, my colleagues, and the patients we care for. Any hospital experience is a memorable occasion. I am seeking to be a part of a team that considers this to be a time when a human being needs the most effective and

compassionate treatment. I lead by example. It is extremely important to display excellent stewardship of resources, reliability, punctuality, safety, and excellent patient care. I believe that learning opportunities are just as important as teaching moments. I have found nursing a diligent and dynamic profession.
